

QUALITY ENGINEER

Janspeed Technologies Ltd have been a leading manufacturer of performance exhaust systems since 1962 and are currently expanding their product range and diversifying into other industries.

We are looking for a Quality Engineer to join our growing, thriving team in Salisbury.

Main duties and responsibilities:

- Help with or establish test procedures for quality assurance of finished product.
- Carry out daily quality checks on production parts.
- Work with external resources to resolve product issues.
- Provide Quality Engineering support to Manufacturing Operations.
- Manage the Company Quality Manual in line with ISO:9001 2015 and IATF 16949, and maintain and ensure compliance
- Manage successful application and accreditation to ISO:14001
- Prepare for, and ensure compliance with customer quality Audits
- Liaise with customers regarding quality issues
- Carry out supplier audits – UK and abroad when required
- Conduct internal quality audits
- Supplier and Customer visits when required to provide support
- Investigate and implement improvements to existing product processes.
- Identify customer problems and create functional solutions
- In process inspection, analysis, measuring and report generation
- Train in specific and other functions to improve overall skill level to support the Company

Person Specification:

- Excellent working knowledge of Microsoft Office.
- Experience of carrying out internal and supplier quality audits.
- Clear verbal and written communication skills.
- Excellent listening skills.
- High attention to detail.
- Able to work under own initiative.
- ISO:9001 2015 Internal Auditor qualification.
- Experience of IATF 16949 desirable but training can be given.
- Experience in working in a manufacturing environment.
